

Six Egyptian approvals
stand between your
board’s decision and your
first lawful transaction.
*One of them now has a
deadline.*

This profile sets out the sequence, the authority that controls each gate, the instrument it applies, and the specific way foreign entrants fail it.

Nearest binding date	What ends	Who it reaches
31 October 2026	PDPL grace period	Controllers outside Egypt

What has changed in Egyptian law that your existing Egypt memo does not cover

61

days to 31 October 2026, counted from 31 August 2026

The Personal Data Protection Law becomes enforceable

Law 151/2020 has been on the books since 2020, but its Executive Regulations were only issued by Decree 816 of 1 November 2025. The twelve-month grace period they opened ends on 31 October 2026. After that date, licensing through the Personal Data Protection Centre is a condition of processing, not a formality to schedule later — and the law reaches controllers outside Egypt who process the data of people in it.

1 June 2024

Merger control became suspensory. Under Law 3/2005 as amended by Law 175/2022, qualifying transactions must be cleared by the Egyptian Competition Authority before closing. Deals structured on the old post-closing notification regime are being signed with the wrong conditions precedent.

1 September 2025

Labour Law 14/2025 replaced Law 12/2003 in full. Templates, handbooks and secondment arrangements drafted against the 2003 law are now drafted against a repealed statute.

1 October 2025

Specialised labour courts opened. Employment disputes no longer follow the general civil track, which changes both timetable and forum strategy.

1 November 2025

PDPL Executive Regulations issued by Decree 816. Cross-border transfer, electronic marketing and surveillance each require their own licence, separately applied for.

Six gates. Each has an authority, an instrument, and a way entrants fail it.

Order matters more than speed. Gates 3 and 5 are the two that most often force a signed transaction to be reopened, because both bind before completion rather than after it.

01

Vehicle

Establish the vehicle and the investment licence

Authority General Authority for Investment and Free Zones (GAFI), through the one-stop shop

Instrument Investment Law 72/2017; Companies Law 159/1981

How entrants fail it

The form is chosen for speed of registration and only afterwards tested against the sector licence in gate 2 and the merger analysis in gate 3. Where the licence the business actually needs cannot be held by the vehicle already registered, the entrant restructures at its own cost — after the group has announced the entry.

02

Sector

Obtain the sector authorisation before you rely on it

Authority Sector regulator — Egyptian Drug Authority for medicines and medical devices; Financial Regulatory Authority for FRA-regulated activities

Instrument Fill in: governing instrument for the sector authorisation, confirmed per matter

How entrants fail it

Commercial timetables are built on the registration date at gate 1 and treat the sector authorisation as an administrative follow-up. Distribution agreements, supply commitments and launch dates are then signed against a licence that does not yet exist, and the counterparty holds the entrant to dates it cannot lawfully meet.

03

Merger control

Clear merger control before closing, not after

Authority Egyptian Competition Authority; FRA-regulated activities follow a separate route

Instrument Law 3/2005 as amended by Law 175/2022; Executive Regulations, PM Decree 1120/2024. Suspensory since 1 June 2024

Thresholds Domestic: combined Egyptian turnover or assets above EGP 900 million, at least two parties each above EGP 200 million. Global: combined worldwide turnover or assets above EGP 7.5 billion

How entrants fail it

The global test is read as an Egypt-nexus test. A transaction with modest Egyptian revenue but large worldwide figures is assumed to be out of scope, the filing is not made, and the parties close. The defect is discovered on the next transaction or in diligence by the buyer after them.

04

Workforce

Hire under the statute that is actually in force

Authority Ministry of Labour; specialised labour courts since 1 October 2025
Instrument Labour Law 14/2025, in force 1 September 2025, replacing Law 12/2003 in full. Contracts are made in four counterparts

How entrants fail it

Group templates are localised once, at entry, and then reused. Contracts issued after 1 September 2025 on a 12/2003 basis carry terms drawn from a repealed statute, and the first dispute is heard by a court built specifically to hear it.

05

Data

Register and licence your processing before 31 October 2026

Authority Personal Data Protection Centre
Instrument Law 151/2020; Executive Regulations, Decree 816 of 1 November 2025
Reach Extraterritorial. A controller with no Egyptian entity can still be within scope

How entrants fail it

The group treats its existing GDPR programme as sufficient and schedules Egypt for the next compliance cycle. The Egyptian requirement is licensing, not documentation, and the licence is granted to an applicant — a mapped data flow with no licence behind it is still unlawful on 1 November 2026.

06

Transfers

Licence each cross-border transfer, marketing and surveillance activity separately

Authority Personal Data Protection Centre, on separate applications
Instrument Separate licences under Law 151/2020 and Decree 816 of 1 November 2025

How entrants fail it

One registration is treated as covering the whole programme. In practice the routine operations of a foreign group — sending HR and customer data to a parent, running campaigns from a regional marketing platform, operating cameras on site — each sit under their own licence, and the ones nobody applied for are the ones that surface in an inspection.

The sequence above states the position at 31 August 2026 and is not advice on any specific transaction.

Six questions. The answer is a list you can put in front of your board.

Tick as you read: each yes turns on the gate named beside it. The interactive profile computes the same result, merger-control arithmetic included.

Are you establishing or acquiring a legal presence in Egypt?

A company, branch, representative office, or the shares of an existing Egyptian entity.

☐ Yes ☐ No

Yes → Gate 01

Does your activity need a sector authorisation?

Medicines and medical devices (Egyptian Drug Authority); financial activities (Financial Regulatory Authority); other regulated sectors.

☐ Yes ☐ No

Yes → Gate 02

Is there a transaction — an acquisition, merger or joint venture?

Suspensory since 1 June 2024: qualifying transactions are cleared before closing. Test the figures below.

☐ Yes ☐ No

Yes → Gate 03

Will you employ or second people in Egypt?

Labour Law 14/2025 replaced Law 12/2003 in full on 1 September 2025.

☐ Yes ☐ No

Yes → Gate 04

Will you process the personal data of people in Egypt?

Customers, employees, patients or trial subjects — including controllers with no Egyptian entity. Grace period ends 31 October 2026.

☐ Yes ☐ No

Yes → Gate 05

Will that data leave Egypt, or will you run electronic marketing or surveillance?

Transfers to a parent or regional platform, campaigns run from outside Egypt, cameras on site — each licensed separately.

☐ Yes ☐ No

Yes → Gate 06

Domestic test

Met where combined Egyptian turnover or assets exceed EGP 900 million and at least two parties each exceed EGP 200 million.

Combined Egyptian turnover
or assets (EGP m)

Two parties each above EGP
200 million?

Global test

Met where combined worldwide turnover or assets exceed EGP 7.5 billion. FRA-regulated activities follow a separate route.

Combined worldwide turnover
or assets (EGP m)

Either test met? Filing before
closing

This worksheet applies published instruments to the facts you enter. It is a checklist, not advice on a specific transaction, and the basis on which turnover and assets are calculated decides the merger-control answer.

Every matter is handled by the lawyer you met. There is no one else for it to go to.

Jacqueline Saad
Founder, JS Law Firm

Jacqueline Saad founded JS Law Firm in Cairo in January 2026, after 29 years in practice and a period as Executive Partner of a leading Egyptian firm. She practises in corporate law, healthcare and life sciences, media, competition, and regulatory and legal compliance, concentrated in pharmaceuticals, high-net-worth clients, and the tourism and transport sectors.

Admission	Egyptian Court of Cassation, April 2022
Education	LL.M., American University in Cairo LL.M., Vrije Universiteit Brussel
Recognition	Lawyer of the Year, Life Sciences & Pharma — Legalcommunity MENA, 2025 Ranked, Venture Capital — Chambers & Partners Global Guide, 2023–2025 Corporate Practice Head — Legal 500 EMEA
Memberships	Arab Lawyers’ Union Italian Chamber of Commerce German Chamber of Commerce (AHK)
Languages of advice	Arabic, English, German, Italian

The firm is months old. That is the point of it.

Foreign investors mistrust local counsel for a reason they rarely put in writing: they are quoted a partner rate, they instruct the partner they met, and the work is done by an associate they never met and cannot assess. The bill is the partner’s; the judgement is not.

JS Law Firm has no leverage pyramid to feed. Matters are taken on the basis that senior counsel does the work — the diligence, the regulator meeting, the drafting — or the firm does not take the matter. That constrains volume. It is the constraint the model is built on, and the reason a general counsel can say who did the work when asked internally.

Advice in German, from the lawyer conducting the matter

Beratung auf Deutsch — nicht in Übersetzung.

German-speaking investors approaching Egypt usually receive advice in English, translated internally, and then explained a second time to a board that reads German. Each pass loses the qualifications that matter: what is licensed, what is conditional, and what is not yet approved.

The German Desk removes the intermediate step. Instructions, regulator correspondence and board-facing memoranda are handled in German by the same counsel conducting the matter — the firm advises in Arabic, English, German and Italian, and is a member of the German Chamber of Commerce in Egypt (AHK).

Languages of advice: Arabic, English, German, Italian

AHK

Member, German Chamber of Commerce in Egypt

29

Years in Egyptian practice before the firm was founded

2

LL.M. degrees — American University in Cairo; Vrije Universiteit Brussel

Organised by the decision in front of you, not by the name of the practice area

“We are entering Egypt and have to choose a structure.”

Incorporation and business formation under Companies Law 159/1981 and Investment Law 72/2017, sequenced against the sector authorisation and the merger analysis before the vehicle is registered rather than after.

“We are buying, selling or restructuring an Egyptian business.”

M&A, corporate restructuring and legal due diligence, with the suspensory merger filing under Law 3/2005 as amended treated as a condition to closing.

“A regulator has opened a file on us.”

Regulatory and compliance work before the sector authority — including matters before the Egyptian Drug Authority — competition compliance, and internal and workplace investigations.

“We need a product, trial or approval into the Egyptian market.”

Healthcare and life sciences: clinical trials, regulatory approvals, intellectual property, and distributor and third-party contracting for pharmaceutical supply.

“We are hiring, restructuring or exiting people in Egypt.”

Employment under Labour Law 14/2025: contracts and policies, social insurance compliance, workplace investigations, and disputes now heard by the specialised labour courts.

“Our data leaves Egypt, or we market to people in it.”

Data protection under Law 151/2020 and Decree 816/2025: registration, the separate cross-border transfer, electronic marketing and surveillance licences, and the extraterritorial analysis for controllers with no Egyptian entity.

“The commercial relationship has failed.”

Civil, commercial and criminal litigation, arbitration, and enforcement of awards — conducted by counsel admitted before the Court of Cassation.

“We hold Egyptian assets or interests personally.”

Private client work for high-net-worth individuals, and real estate, hospitality and tourism matters including hotel management and licensing agreements.

Work conducted by the founder, in practice and at the firm

Outcomes are stated only where the client has confirmed they may be published.
Where a figure or result is not yet cleared for publication it is shown as an open field rather than described in general terms.

Animal health and life sciences

Counsel to a leading global animal health company on the restructuring of its Egyptian trading and importation arms, corporate compliance, and matters before the Egyptian Drug Authority.

Outcome

Fill in: restructuring completion date and cleared outcome, on client approval

Fortune 500 pharmaceutical companies

Ongoing advice to multiple global pharmaceutical clients on Egypt’s clinical trials legal and regulatory framework.

Outcome

Fill in: number of trial programmes advised and approval record, on client approval

Pharmaceutical distribution

Distributor and third-party contract negotiations, risk allocation, and regulatory compliance for supply into Egypt.

Outcome

Fill in: contract value or volume and result, on client approval

Humanitarian and relief logistics

Incorporation of the Egyptian legal instruments supporting Gaza relief operations, in coordination with UNRWA and the Red Crescent.

Outcome

Instruments put in place on the timetable the relief operation required.

“Jacqueline Saad is always available to accommodate us and help us in every situation.”

Client testimonial recorded in Legal 500 EMEA, 2024.

What you are buying, what it costs, and what arrives

Fees

One rate, because one lawyer does the work. There is no associate rate below it and no partner premium above it.

Hourly rate: Fill in: rate and currency. Fixed fees are quoted for defined gates — an entry structure, a merger filing, a PDPL licensing set — where scope can be closed in advance: Fill in: fixed-fee schedule.

Scoping

- An instruction opens with a written scope naming the gates in issue, the authority for each, and what is excluded.
- Work outside that scope is quoted before it is started, not reported after.
- Estimates are given per gate, so a budget can be approved in the same units the regulator works in.

Reporting

- Advice states what is licensed, what is conditional, and what is not yet approved — separately, in those terms.
- Reporting is written to be forwarded internally without translation or a covering explanation, in Arabic, English, German or Italian.
- Regulator correspondence is copied to you as it is sent, not summarised at the end of the matter.
- Conflicts are checked and confirmed in writing before an instruction is accepted.

Fees, scope and reporting for a specific matter are fixed in the engagement letter before work begins.

Send the gate you are stuck at.

An initial view on which gates apply to a specific transaction, and in what order, is given before an engagement is opened.
